

SEZIBERA CONSTRUCTION

Website Copy Deck & Content Request

This document lists every piece of text, every photograph and every business detail needed to complete the website — mapped slot by slot onto the design being built.

Anything left blank will appear on the live site as a visible placeholder note. Nothing will be invented.

Prepared 11 August 2026

Design reference: Mace Consult (mace.com) — layout and structure only, rendered in the Sezibera monochrome palette

How to use this document

The site is built from a fixed set of layout components taken from the reference design. Each component has a slot for text, and each slot has a length the design can carry. Write over the length and the layout breaks; write under it and the page looks thin.

Every table below has four columns:

- Slot — the component on the page
- Reference example — the equivalent text on the reference site, so you can see the tone and length intended
- Limit — the number of characters the design can carry, including spaces
- Your content — write here

Priority key

BLOCKER — the site should not go live without this.

IMPORTANT — the page looks generic or thin without it.

OPTIONAL — improves credibility; can follow later.

A note on tone

The reference site uses short, declarative sentences and avoids marketing inflation. "We deliver certainty" rather than "We are passionate about delivering world-class excellence." Concrete beats grand: a real square-metre figure is worth more than any adjective. Write plainly and I will tighten it to fit.

If a question does not apply to your business, write "N/A" rather than leaving it blank — that way I know it was considered and not overlooked.

Part 0 — Confirm or correct

Read this part first. Everything here is already live on the site, taken either from your old website or assumed by me. Each item needs a yes or a correction.

0.1 Taken from your old site

Item	Currently on the site	Correct? If not, write the right version
Phone number	+250 788 358 876	
Tagline	Building Africa's future	
Value 1	Client Peace of Mind	
Value 2	Hands-On Quality	
Value 3	End-to-End Responsibility	
Value 4	No-Excuse Delivery	
Legal name	Sezibera Construction Ltd	
Country	Rwanda	

0.2 Things I assumed — these need correcting most urgently

These are my inventions, not your information.

1. Your service list. I wrote six capabilities: building construction; structural & civil works; site preparation & groundworks; finishing & fit-out; renovation & remodelling; site & project management. I made this list up based on what a general building contractor typically does. It is very likely wrong in places.
2. "Reinforced concrete frame" on the Glads Apartment description — inferred from looking at the photographs.
3. "Four storeys" for Glads Apartment — counted from the photographs.
4. Mission and vision. Your old versions referenced material supply and car rental, which we have dropped, so I rewrote both. My drafts are below for approval or replacement.
5. Social media links point at bare linkedin.com, instagram.com and facebook.com. They are dead placeholders.
6. The old site was branded "MSIGI5S Group" and described a holding company. I discarded all of that content and its logo files.

My draft mission — approve, or replace

"To deliver complete construction solutions — from groundworks and structure through to final finishes — with quality and reliability at every stage of the build."

- ☐ Approved as written
- ☐ Replace with the text I have written in section 3.3

My draft vision — approve, or replace

"To be Africa's most trusted building contractor — the company clients call when the project has to be right."

- ☐ Approved as written
- ☐ Replace with the text I have written in section 3.3

Part 1 — Global elements

These appear on every page, so they only need answering once.

1.1 Utility bar

The thin strip above the main navigation. On the reference site it carries Corporate, Careers, News, Contact us, a region selector and a language selector.

Slot	Reference example	Limit	Your content
Utility link 1	<i>Corporate</i>	14 chars	
Utility link 2	<i>Careers</i>	14 chars	
Utility link 3	<i>News</i>	14 chars	
Utility link 4	<i>Contact us</i>	14 chars	
Region label	<i>Middle East and Africa</i>	24 chars	
Language	<i>EN-GB</i>	Do you need Kinyarwanda or French?	

1.2 Main navigation

Five top-level items is the maximum the bar carries comfortably before it wraps.

Slot	Reference example	Limit	Your content
Nav item 1	<i>What we do</i>	18 chars	
Nav item 2	<i>Who we are</i>	18 chars	
Nav item 3	<i>What we care about</i>	18 chars	
Nav item 4	<i>Where we're located</i>	18 chars	
Nav item 5	<i>Projects</i>	18 chars	

- ☐ Do you want a News / Insights section? It needs at least 3 articles to not look abandoned.
- ☐ Do you want a Careers section?
- ☐ Do you want a "What we care about" section covering health & safety and sustainability?

1.3 Mega menu panel

Opens beneath the navigation. A short positioning line sits on the left, with the section's sub-pages listed to the right.

Slot	Reference example	Limit	Your content
Panel intro line	<i>We bring certainty to the world's most impactful infrastructure and capital programmes.</i>	95 chars	

1.4 Footer

Slot	Reference example	Limit	Your content
Column 1 heading	<i>Corporate</i>	20 chars	
Column 2 heading	<i>What we do</i>	20 chars	
Tagline	<i>CERTAINTY AT EVERY STEP</i>	30 chars, sits beside a vertical rule	
Social — LinkedIn	<i>Full profile URL</i>	URL	
Social — Instagram	<i>Full profile URL</i>	URL	
Social — Facebook	<i>Full profile URL</i>	URL	
Social — YouTube	<i>Full profile URL</i>	URL, optional	

The reference tagline "CERTAINTY AT EVERY STEP" is three short words on two lines. "Building Africa's future" fits the same slot. Confirm or replace.

1.5 Legal bar

The reference site lists Privacy, Cookies, Terms of Use, Accessibility Statement and a Modern Slavery statement. Tell me which of these you need; I can draft them, but anything legally binding should be reviewed by a lawyer.

- ☐ Privacy policy — required if the contact form collects personal data
- ☐ Cookie notice — required if analytics is added
- ☐ Terms of use
- ☐ Accessibility statement
- ☐ Health & safety policy statement

Slot	Reference example	Limit	Your content
Copyright line	<i>Mace Consult Limited 2026</i>	45 chars	
Company reg. no.	<i>Shown in footer</i>	As registered	

Part 2 — Homepage

2.1 Hero banner

A full-width photograph with a solid colour plate offset over it. The title is large, light-weight and widely letter-spaced; the subtitle sits beneath it in bold.

Slot	Reference example	Limit	Your content
Banner title	<i>MACE CONSULT</i>	2 lines, max 16 chars per line	
Banner subtitle	<i>Delivering certainty to the world's most impactful infrastructure and capital development programmes</i>	110 chars	
Button label	<i>Find out how Mace Consult is setting the standard</i>	55 chars	
Button destination	<i>Links to a page</i>	Page name	
Background photo	<i>Wide cityscape</i>	See Part 7 for specs	

2.2 Statement line

Large centred uppercase text below the banner. Two or three very short phrases, each ending in a full stop. This is the single most quoted line on the site — it is worth taking time over.

Slot	Reference example	Limit	Your content
Statement	<i>BOUNDLESS AMBITION. EXCEPTIONAL OUTCOMES.</i>	55 chars total, 2–3 phrases	

Other reference examples: "SUSTAINABLE. INCLUSIVE. RESILIENT. CONNECTED." — currently on your site: "BUILT WITH CERTAINTY. DELIVERED WITHOUT EXCUSES."

2.3 Featured news band

A single highlighted announcement strip. Optional — leave blank if you have no news to carry.

Slot	Reference example	Limit	Your content
Label	<i>FEATURED NEWS</i>	18 chars	
Headline	<i>Mace Consult launches as a standalone company to set new standards</i>	110 chars	
Link destination	<i>Article page</i>	URL or page	

2.4 Latest insights grid

A mixed grid of article cards, each tagged PERSPECTIVE, REPORT or NEWS. This section needs a minimum of five items to look right. Skip it entirely if you do not intend to publish articles — an empty or stale news section

damages credibility more than having none.

- ☐ Include an insights/news section
- ☐ Skip it for now

If including, for each article:

Slot	Reference example	Limit	Your content
Category tag	<i>PERSPECTIVE / REPORT / NEWS</i>	12 chars	
Headline	<i>The three keys to accelerating infrastructure delivery</i>	75 chars	
Thumbnail	<i>Landscape photo</i>	See Part 7	
Body	<i>Full article text</i>	400–900 words	
Author & date	<i>Name, role, publication date</i>	—	

2.5 Featured projects carousel

A large image carousel with arrows and dot indicators, already built. Each slide carries a label, a project name and a headline. Three to six slides works best.

Slot	Reference example	Limit	Your content
Slide label	<i>PROJECT</i>	20 chars	
Project name	<i>Metrolinx GO and Subways expansion programs</i>	55 chars	
Headline	<i>The largest transit infrastructure investments in Canadian history</i>	85 chars	
Slide photo	<i>Wide project photo</i>	See Part 7	

Repeat these four fields for each slide. Currently the carousel shows one project — Glads Apartment — across three photographs of the same building.

2.6 Capability card grid

A grid of four to six cards. Each is a short title over one or two lines of description, with an optional photograph.

Slot	Reference example	Limit	Your content
Card title	<i>Cities and places</i>	28 chars	
Card description	<i>One or two lines</i>	95 chars	
Card photo	<i>Square-ish landscape</i>	Optional, see Part 7	

2.7 Dual call-to-action band

Slot	Reference example	Limit	Your content
Left heading	<i>How can we help?</i>	26 chars	

Slot	Reference example	Limit	Your content
Left sub-line	<i>Send us a message</i>	45 chars	
Left button	<i>Contact us</i>	18 chars	
Right heading	<i>Careers at Mace</i>	26 chars	
Right sub-line	<i>Explore our current vacancies</i>	45 chars	
Right button	<i>Visit careers</i>	18 chars	

Part 3 — Who we are

3.1 Page banner

Slot	Reference example	Limit	Your content
Page kicker	<i>WHO WE ARE</i>	30 chars, sits above the banner	
Banner title	<i>PURPOSE AND PRIORITIES</i>	2 lines, max 16 chars per line	
Banner subtitle	<i>Our purpose: to redefine the boundaries of ambition.</i>	85 chars	
Banner photo	<i>Architectural detail</i>	See Part 7	

3.2 Opening statement and intro

Slot	Reference example	Limit	Your content
Bold opening line	<i>We have a greater responsibility than ever to lead with purpose.</i>	110 chars, displayed larger and bolder	
Body paragraph 1	<i>Whether we're building new communities around the world...</i>	280–450 chars	
Body paragraph 2	<i>We're living our purpose through three strategic priorities...</i>	280–450 chars	
Body paragraph 3	<i>For us, redefining the boundaries of ambition means...</i>	280–450 chars, optional	
Closing line	<i>A world where our legacy endures, and our ambition has no boundaries.</i>	90 chars, optional	

To write these paragraphs, answer in your own words — I will shape them to fit:

- ☐ How and why was the company founded?
- ☐ What do you do differently from other contractors in Rwanda?
- ☐ What kind of client is the best fit for you?
- ☐ What is the hardest project you have delivered, and what did it prove?

3.3 Accordion rows

Expandable rows with a plus icon. Three to four works best. On your site these currently hold Mission, Vision and Values.

Slot	Reference example	Limit	Your content
Row 1 title	<i>Pursue a sustainable world</i>	55 chars	
Row 1 body	<i>Hidden until expanded</i>	300–700 chars	
Row 2 title	<i>Grow together</i>	55 chars	

Slot	Reference example	Limit	Your content
Row 2 body	—	300–700 chars	
Row 3 title	<i>Deliver distinctive value</i>	55 chars	
Row 3 body	—	300–700 chars	

If you keep Mission / Vision / Values here, each value ideally gets one explanatory sentence rather than sitting as a bare phrase.

3.4 Leadership

The reference site shows an executive committee as a grid of photo cards, each with a name, a role and a "Read more" button opening a full biography.

I found Martin SEZIBERA, General Manager, on your staff ID badge files. He is not on the site because I have nothing else about him.

Who should appear — the General Manager alone, or the full management team?

For each person:

Slot	Reference example	Limit	Your content
Full name	<i>Davendra Dabasia</i>	35 chars	
Job title	<i>Chief Executive Officer</i>	45 chars, wraps to 2 lines	
Headshot	<i>Professional portrait</i>	See Part 7.3	
Biography	<i>Opens on "Read more"</i>	400–900 chars	
Qualifications	<i>Years in construction, memberships</i>	—	
LinkedIn	<i>Profile URL</i>	Optional	

3.5 Company facts

Real numbers build trust far faster than adjectives. Every figure below that you can supply makes the site measurably more convincing.

- ☐ Year founded
- ☐ Projects completed to date
- ☐ Total square metres built
- ☐ Number of permanent employees
- ☐ Typical site headcount
- ☐ Safety record — e.g. days without a lost-time incident
- ☐ Districts or provinces you work in
- ☐ Do you work outside Rwanda? Where?
- ☐ Smallest and largest project you will take on

Part 4 — What we do

4.1 Section landing page

Slot	Reference example	Limit	Your content
Page kicker	<i>CONSULTANCY</i>	30 chars	
Banner title	<i>PROGRAMME AND PROJECT MANAGEMENT</i>	3 lines, max 16 chars per line	
Banner subtitle	<i>Agile partners for global clients, building flexibility into planning and delivery.</i>	95 chars	
Bold opening	<i>Our programme management expertise helps clients improve performance...</i>	200–320 chars	
Body paragraphs	<i>4–5 paragraphs follow</i>	280–450 chars each	

4.2 One page per service

The six services currently on your site are my invention. Correct this list before anything else.

Currently listed: building construction; structural & civil works; site preparation & groundworks; finishing & fit-out; renovation & remodelling; site & project management.

Cross out what you do not do. Add what is missing. Reorder by what earns you the most work — the first item gets the most attention.

For each service you confirm, I need the full set below.

Slot	Reference example	Limit	Your content
Service name	<i>Cost and commercial management</i>	40 chars	
One-line summary	<i>Used on cards and in the menu</i>	95 chars	
Bold opening	<i>Lead paragraph</i>	200–320 chars	
Body paragraphs	<i>2–4 paragraphs</i>	280–450 chars each	
Accordion 1 title	<i>Client focus</i>	55 chars	
Accordion 1 body	—	300–700 chars	
Accordion 2 title	<i>Project management</i>	55 chars	
Accordion 2 body	—	300–700 chars	
Accordion 3 title	<i>Integration with client teams</i>	55 chars	
Accordion 3 body	—	300–700 chars	
Photos	<i>Your team doing this work</i>	2–3, see Part 7	

Slot	Reference example	Limit	Your content
Example project	<i>Links to a project page</i>	Project name	

4.3 Scope questions

These determine what the service pages can honestly claim.

- ☐ Do you produce architectural or structural drawings in-house, or build to the client's drawings?
- ☐ Do you handle permits and authority approvals?
- ☐ Do you self-perform MEP — plumbing, electrical, HVAC — or subcontract it?
- ☐ Do you offer design-build, or construction only?
- ☐ Do you take on civil or infrastructure work — roads, drainage — as standalone jobs?
- ☐ Do you supply materials, or does the client?
- ☐ Do you offer a defects liability or warranty period? How long?
- ☐ Do you work as main contractor, subcontractor, or both?
- ☐ What is your typical project duration?

Part 5 — Projects

This is the highest-value section you can fill, and currently the thinnest.

The site has one project — Glads Apartment — represented by three exterior photographs of the same building. For a construction company the portfolio is the sales pitch. Aim for six to ten projects. In-progress and older work both count.

5.1 Listing page

The reference listing page has filter dropdowns, a result count, a sort control and a paginated card grid.

Slot	Reference example	Limit	Your content
Banner title	<i>PROJECTS</i>	2 lines, max 16 chars per line	
Banner subtitle	<i>Shaping skylines and creating vital infrastructure.</i>	140 chars	
Filter 1	<i>Location</i>	List your districts	
Filter 2	<i>Sector</i>	List your project types	

Sector list to confirm — cross out any you do not build:

Residential · Apartments · Commercial · Retail · Offices · Hospitality · Education · Healthcare · Industrial · Institutional · Mixed-use · Civil / infrastructure

5.2 Project card

Slot	Reference example	Limit	Your content
Label	<i>PROJECT</i>	20 chars	
Client or project	<i>Canberra Theatre Redevelopment</i>	45 chars	
Headline	<i>Putting Canberra on the map for world-class productions</i>	70 chars	
Thumbnail	<i>Landscape photo</i>	See Part 7	

5.3 Per-project data — copy this set for every project

Slot	Reference example	Limit	Your content
Project name	—	45 chars	
Location	<i>District / sector</i>	—	
Client name	<i>Or mark confidential</i>	Needs written permission	
Sector	<i>From the list above</i>	—	
Your scope	<i>What exactly did you do?</i>	—	
Size	<i>m², storeys, number of units</i>	—	

Slot	Reference example	Limit	Your content
Start date	—	Month/year	
Completion date	—	Month/year	
Status	<i>Completed / in progress / on hold</i>	—	
Contract value	<i>Optional</i>	Say if private	
Main or sub?	<i>Were you main contractor?</i>	—	
Headline	<i>One line for the card</i>	70 chars	
Description	<i>Full project write-up</i>	600–1,200 chars	
Challenge	<i>Anything difficult or unusual</i>	300–600 chars, optional	
Photos	<i>5–10 per project</i>	See Part 7	

5.4 Glads Apartment — specific gaps

- ☐ Confirm the correct project name and spelling
- ☐ Location — district and sector
- ☐ Confirm the storey count (I counted four from the photos)
- ☐ Number of apartments
- ☐ Confirm the structural system (I assumed reinforced concrete frame)
- ☐ Completion date
- ☐ Client name, and whether it may be published
- ☐ Were you the main contractor or a subcontractor?
- ☐ Interior photographs — I have exterior shots only
- ☐ Construction-in-progress photographs

Part 6 — Contact

6.1 Page banner

Slot	Reference example	Limit	Your content
Banner title	<i>CONTACT US</i>	2 lines, max 16 chars per line	
Banner subtitle	<i>Short supporting line</i>	85 chars	

6.2 Named contact cards

The reference site puts a photograph, a name, a role and a "Get in touch" button in the contact section. Naming a real person converts far better than a generic form.

Slot	Reference example	Limit	Your content
Name	<i>Louise Sunderland</i>	35 chars	
Role	<i>Head of Cities & Places</i>	50 chars	
Photo	<i>Professional portrait</i>	See Part 7.3	
Direct email	<i>Behind the button</i>	Email	
Direct phone	<i>Optional</i>	Phone	

6.3 Contact details

The contact form currently sends nothing.

It shows a confirmation message and discards the submission. To make it work I need an email address to route enquiries to, plus permission to connect a form service such as Formspree or Web3Forms.

- ☐ Full physical office address
- ☐ General enquiries email address — BLOCKER
- ☐ Separate tenders / quotes email, if used
- ☐ Main phone — confirm +250 788 358 876
- ☐ Second phone or WhatsApp number
- ☐ Office opening hours
- ☐ Google Maps link or coordinates for the office
- ☐ Should enquiries also trigger a WhatsApp message?

6.4 Form fields

Currently: name, phone, project type, site location, message. Confirm or amend.

- ☐ Add an email field
- ☐ Add a budget range field
- ☐ Add a "how did you hear about us" field
- ☐ Add a file upload for drawings or tender documents

Part 7 — Photography and video

7.1 Technical specifications

- Format: JPG or PNG, straight from the camera
- Resolution: at least 2000 pixels on the long edge — more is better
- Do not send WhatsApp copies. WhatsApp compresses images heavily and they look soft and blocky on a large screen
- Orientation: mostly landscape, with a few portrait shots for variety
- Delivery: Google Drive, WeTransfer or Dropbox link, or a folder on this machine
- Naming: projectname-01.jpg, projectname-02.jpg, and so on

7.2 Project photography — BLOCKER

Per project:

- ☐ Wide exterior, straight on
- ☐ Exterior at an angle, showing depth
- ☐ Detail shots — brickwork, finishes, joinery, balconies
- ☐ Interiors — living spaces, circulation, stairwells
- ☐ Before and after, for renovations

Work in progress — this is what separates a real contractor's site from a template:

- ☐ Groundworks and excavation
- ☐ Steel fixing and formwork
- ☐ Concrete pours
- ☐ Masonry going up
- ☐ Finishing trades at work
- ☐ Site meetings, setting out, surveying

7.3 People

- ☐ Crew on site in PPE
- ☐ Leadership headshots — plain background, consistent lighting, shot at the same time if possible
- ☐ Team group photograph
- ☐ Site supervisors working with drawings

7.4 Equipment and premises

- ☐ Plant and machinery you own
- ☐ Branded vehicles
- ☐ Office or yard exterior

7.5 Video

The reference site uses a looping video in one banner. If you supply video I will host it on YouTube or Vimeo and embed it, so it does not slow the site down.

- ☐ Site walkthrough or drone footage — MP4, 1080p or 4K
- ☐ Company introduction from the General Manager — 30 to 60 seconds

- ☐ Time-lapse of a build
- ☐ Client testimonial clips

7.6 Permissions — BLOCKER

- ☐ Do you own the rights to every photograph supplied? If a photographer shot them, confirm you may publish them
- ☐ Do you have permission to show client buildings and to name clients?
- ☐ Have staff consented to appearing on the website?

Part 8 — Credentials and proof

8.1 Certifications and registrations

- ☐ RDB registration number
- ☐ Contractor licence or classification grade
- ☐ Professional body memberships
- ☐ ISO or quality certifications
- ☐ Health and safety accreditations
- ☐ Insurance held — public liability, works, workers' compensation
- ☐ Logo files for any of the above

8.2 Clients and testimonials

For each testimonial I need the quote, the person's name, their title and their company — an unattributed quote reads as invented.

Slot	Reference example	Limit	Your content
Quote	—	150–300 chars	
Name	—	35 chars	
Title & company	—	55 chars	
Permission granted	—	Yes / no	

- ☐ Client logos you may display, with permission
- ☐ Awards or recognition received

8.3 Careers

- ☐ Do you want a careers page?
- ☐ Are you currently hiring? For what roles?
- ☐ Email address for job applications
- ☐ Why should someone want to work at Sezibera?

Part 9 — Technical setup

9.1 Domain and hosting

- ☐ Do you own a domain? Which one?
- ☐ Who is it registered with, and do you have login access?
- ☐ Where should the site be hosted? The old site appears to have been on Vercel
- ☐ Do you need business email on the domain, e.g. info@yourdomain.rw?

9.2 Analytics and listings

- ☐ Google Analytics?
- ☐ Google Business Profile — should it be linked?
- ☐ Facebook Pixel or similar?

9.3 Language

- ☐ English only
- ☐ English and Kinyarwanda
- ☐ English, Kinyarwanda and French

9.4 Design confirmations

Slot	Reference example	Limit	Your content
Palette	<i>Black, white, grey, matte black</i>	Confirm strictly monochrome, or allow one accent colour for buttons and links	
Photo treatment	<i>Full colour</i>	Confirm, or switch to black and white	
Typeface	<i>Helvetica Neue, Inter fallback</i>	Approve or name a preference	
Logo vector	<i>Extracted from your PDF</i>	Do you have the original .ai, .svg or .eps?	
Brand guidelines	<i>Not supplied</i>	Do these exist?	

Part 10 — If you only do five things

These five turn the site from a well-built template into something that wins work.

1. Project photographs

As many completed projects as you can, with the details listed in section 5.3. This matters more than everything else combined.

2. Work-in-progress photographs

Your crew actually building. Steel fixing, concrete pours, masonry going up. No competitor can copy these.

3. A real email address

The contact form currently discards every enquiry. This is the single most damaging gap on the site.

4. Correct the service list

Section 0.2, item 1. Six services are currently described that I invented on your behalf.

5. Office address and real social links

The social icons currently link to the homepages of LinkedIn, Instagram and Facebook.

Partial answers are welcome — send whatever you have and I will keep building. Anywhere information is still missing, the site will carry a visible placeholder note rather than invented content.
